

We are a pioneer in laser contract processing.

## ■ Machine Specifications

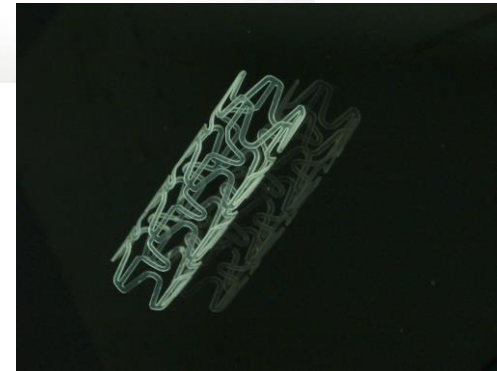

Ultrashort pulse laser processing

- Wavelength: IR, UV
- Materials: able to use on metal, resin and glass
- Pulse width: 10ps>
- Equipped with  $\Theta$  (theta)-axis and Galvano scanner

## ■ Service Strengths

- Capable of miniaturization to areas not processable by cutting tools
- Highly reproducible, and easy to change production patterns
- High-quality processing with few burrs and chips without polishing

## ■ Track Record

- Mass production of endoscopic parts for domestic medical equipment manufacturers
- Mass production of pipes for cardiac surgery
- Manufacturing of microfluidic channels
